When you're making a selection, you can go through reviews and ratings for each book.

[efficiency in reproductive capacity while most of the discussion and literature stress the importance of the age of the mother and the father's responsibility also on the paternal side](#)
[Korosi as reported by tredgold in mental deficiency came to the conclusion as a result of the investigation of 24 000 unselected individuals that the children of fathers below twenty or above forty years of age are weaker than the children of fathers between these ages also the children of mothers over forty years of age are weaker than those born to mothers below this age tredgold presents data connecting defective structures in the brain with certain phases of physical behavior and mental deficiencies he quotes many authors whose data correspond with his own much of this material relates to accounts of incomplete prenatal development of nerve structures in the brain](#)

[Research data have been presented which deal with the anatomical defects of the brain of individuals suffering from the typical mental and physical patterns of the so called mongolian idiot in these cases the gyrus cinguli of the brain were found to be absent which indicates the impossibility that these individuals function normally either physically or mentally](#)

[Modern civilization has provided a large group of the defectives known as mongolian idiots they have very definite characteristics both physical and mental among the former one of the most universal expressions is a vacant stare associated with a face that is markedly underdeveloped in the middle third usually accompanied by narrow nostrils and a narrow upper dental arch](#)

[One of the outstanding characteristics of the group is their inability to develop mentally beyond three to eight years of age because of the difficulty of building a character and intelligence level beyond infancy these unfortunates are housed largely in state institutions for feebleminded since the physical picture is similar to that which occurs in a much less severe form in a large number of individuals in our modern civilization it is important that we study this group in the light of the information that is available with regard to their physical mental and moral characteristics and in the light of such information as is available regarding their origin The surveys that have been made reveal the fact that nearly all of them are born to mothers more than forty years of age and apparently at a period of very low](#)
